

GREEN DAYS

10 ILLUSTRATED PICTURE BOOKS

Special features

A delightful series explaining
10 environmental issues linked with
10 international annual events.

Each volume recounts
a captivating story that encapsulates
an issue for young readers.

Activities and suggestions show
young readers what they can do to
help protect the natural world.

10 World Environmental Events

FEB 2 World Wetland Day

MAR 22 World Water Day

MAY 22 International Day for Biological Diversity

JUN 5 World Environment Day

JUL 11 World Population Day

SEP 22 World Car-free Day

OCT 16 World Food Day

OCT 22 World Energy Day

Last week in NOV Buy Nothing Day

DEC 5 World Soil Day

Green Days

Annual events that
show us how to protect
our environment

FEB 2 World Wetland Day

Vol.1 A Fair Hearing

Author: YANG Dae-seung ✨ Illustrator: PARK Su-jeong

February 2 is World Wetland Day. It highlights the importance of wetlands (rivers, swamps, and marshes) to people, wildlife, and natural processes.

Judge Boco has been asked to conduct one of the strangest court cases that has ever taken place. A construction manager and a salamander are going to debate how wetlands should be used. The judge will have to rule on who is right and who is wrong. What will he decide? And what is the best way to manage wetlands for the benefit of our planet?

MAR 22 World Water Day

Vol.2 A Priceless Treasure

Author: YOON Ji-yeon ✨ Illustrator: KIM Hyeon-ju

March 22 is World Water Day. It reminds us of the priceless value of water and the steps we can take to prevent natural water supplies being polluted or overused.

Suddenly Won could hear the voices of the flowers in the garden. "I'm so thirsty," they were all saying, "so terribly thirsty!" The trees were calling too: "We want cool, clean water." She began to realize that people, including her family, were often wasting water and that they could do more to gather and recycle rainwater. How could she help them to make better use of water?

MAY 22 International Day for Biological Diversity

Vol.3 Not Just Honey

Author: CHA Bogeum ✨ Illustrator: KOH Won-ju

May 22 is the International Day for Biological Diversity, when people are encouraged to learn why we need to preserve all creatures, even the tiniest.

Bom was afraid of bees. "They're such a nuisance," she said. "I wish they would just go away and disappear forever."

"I'll get rid of them all for you," said the robot, as it disappeared out the door.

What would happen if we got rid of bees? Can Bom protect them and prevent disaster?

JUN 5 World Environment Day

Vol.4 Natural Connections

Author: LEE Won-gyeong ✨ Illustrator: JEON Byeong-jun

June 5 is World Environment Day, when people think about ways to protect Earth's natural habitats.

A girl starts drawing with a magic pencil. As she draws bamboo leaves, pandas appear. As she sketches trees and then a forest, orangutans and other animals gather. When she draws seaweed, fish swim by. The drawings reveal the many connections between living things, and the thousands of creatures that could disappear if we fail to take care of our planet.

JUL 11 World Population Day

Vol.5 How Can Santa Help?

Author: SEO Bo-hyeon ✨ Illustrator: KIM Hyeon-ju

July 11 is World Population Day. This event makes people aware of problems relating to the world's population – the ever-growing numbers of people on our planet.

On Christmas Eve, Santa Claus loaded his slide with presents. "Just imagine how happy the children will be!" he said to himself. "Ho Ho Ho!" When he reached Africa and came to the first house, there was no chimney for him to climb down. So he gathered a pile of presents and knocked on the door. A young boy came to the door and said, "Don't you have anything other than toys?" Looking into the house, Santa realized that the people there were poor and had nothing to eat. All over the world, people were short of food and starving. What could he do to help?

SEP 22 World Car-free Day

Vol.6 Something in the Air

Author: YOON A-hae ✨ Illustrator: HONG Wu-ri

September 22 is World Car-free Day, when people are asked to try not using their cars for a day and instead use other modes of transport.

When Chung and her family moved to China, it was ever so exciting for her. But then she noticed that everyone in Beijing wore masks and they all looked like aliens walking down the street. Everyone in kindergarten wore masks, too. Why did they do that? Why was she sometimes not allowed to go outside to play? And why is her friend leaving the city? Seeking answers to these questions helps Chung learn about the problem of air pollution and what we can all do to reduce it.

OCT 16 World Food Day

Vol.7 A Precious Gift

Author: SHIN Yeon-mi ✨ Illustrator: CHO Jun-cheol

October 16 is World Food Day. It encourages people to think about how we can provide enough for everyone to eat and how we can all choose healthier foods and improve our diets.

In a green forest, two monster brothers lived together. One was named Tosi, and one was named Tusi. Their skin colors were different, but they looked exactly the same. One day, Tosi and Tusi helped a man cross a river and received a gift from him. When the man gave them the gift, he said very seriously, "Do not eat this all at once, but instead have only a small amount at a time." Often our favorite foods, such as candies and other tasty snacks, can be harmful. This story shows how we need to learn to eat fewer such snacks and enjoy healthier foods to protect our bodies and the environment.

OCT 22 World Energy Day

Vol. 8 The King of Waste and the King of Saving

Author: JANG Hye-gyeong ✨ Illustrator: BANG Jeong-hwa

October 22 is World Energy Day. This event reminds us how vital our energy supplies are and how we need to use them carefully, as well as develop environmentally friendly forms of renewable energy for the future.

Once upon a time there were two very different kingdoms. One was ruled by the King of Waste, who used everything up as quickly as he could, and one was ruled by the King of Saving, who used things carefully and tried to save as much of everything as possible. When the King of Waste had used up all the energy in his kingdom, he asked if he could borrow some from the King of Saving. The King of Saving said no, but instead offered to teach the King of Waste how to save energy and improve the lives of his subjects. Can the King of Waste change his ways?

Last week in NOV Buy Nothing Day

Vol. 9 Buy Less, Recycle More

Author: KANG Seong-eun ✨ Illustrator: OH Seong-bong

Buy Nothing Day takes place in the last week of November. People are asked not to buy anything that day, so that they start thinking about whether they really need all the things they buy and about the many perfectly good things we regularly throw away.

"I'm bored with this. I'm going to throw it away and get a new one."

"This is out of fashion. Let's get rid of it."

"I need more space. Let's throw this in the trash."

Do we really need all the new things we buy? When we throw things away, could we give them to somebody else instead? And might that help save some of our planet's resources? This book will make you think about what you buy, what you throw away, and new ways to reuse, recycle and save money.

DEC 5 World Soil Day

Vol. 10 Turning out the Worms

Author: LEE Hye-ok ✨ Illustrator: HWANG Seong-hye

December 5 is World Soil Day, which aims to help us understand the importance of good soil and how we can care for and protect it.

Once upon a time, there was a raccoon that planted a potato farm. As he was picking rocks out of the soil, he noticed some earthworms. "Yuk," he said, "they are so gross!"

He began gathering all the earthworms and throwing them out of his field. But, soon after, his crop began to fail, and he started to appreciate the important role that earthworms play in creating rich, fertile soil.
